

PRAHARI

Smart Public Infrastructure
for Urban India

prahari-official.vercel.app

THE CHALLENGE

Public Spaces Deserve Better.

No Emergency Access

Citizens in danger have no visible, physical way to reach help in a public emergency.

Disconnected Spaces

Public environments lack the connected infrastructure needed for real-time safety and response.

Untapped Urban Assets

Street furniture sits idle, generating no civic value and no safety benefit for the community.

THE SOLUTION

One Intelligent Infrastructure Pillar.

PRAHARI turns every public space into a productive, connected, and safe environment. It generates advertising value during the day and delivers emergency infrastructure whenever it is needed.

Why PRAHARI Works

- Advertising revenue funds public safety, with no public expenditure required
- Citizens get visible, accessible emergency access every hour of the day
- Cities gain real-time monitoring and direct communication with the public
- Local businesses get affordable, hyperlocal outdoor advertising

MEET PRAHARI

Engineered for Urban India.

360 Degree Surveillance

Dome camera, continuous coverage

Smart Digital Display

High-brightness outdoor screen

Public Announcements

Wide-area broadcast capability

Remote Monitoring

Cloud dashboard, real-time control

SOS

Emergency SOS Button

IP67 physical button, live operator

Two-Way Communication

Live audio and video to responders

All-Weather Design

Built for continuous outdoor use

4G and WiFi Connected

Always-on cloud connectivity

ONE PLATFORM, TWO MODES

One Product. Two Operating Modes.

PRAHARI shifts seamlessly between commercial display and public safety infrastructure, on the same hardware, without interruption.

Revenue & Utility

The display generates hyperlocal advertising revenue that funds the public safety network. No public budget required.

- Local Business Advertising
- Community Messaging
- Public Information Displays
- Hyperlocal Neighbourhood Reach

Safety Network

One press connects citizens directly to a live operator who can escalate to emergency services immediately.

- SOS Emergency Assistance
- Live Operator Communication
- Public Safety Alerts
- Authority Escalation & Response

DEPLOYMENT ENVIRONMENTS

Engineered to Deploy Across Every Public Setting.

From a single campus to a city-wide network, PRAHARI is planned around where people already gather.

DEPLOYMENT CATEGORIES

08

Public environment
types supported

PRIMARY DEPLOYMENT CONTEXTS

01

Smart Cities

Municipal districts and smart city corridors

02

Universities

Campus grounds and student precincts

03

Metro Stations

Platforms, concourses and station exits

04

Airports

Terminal entrances and car park zones

ADDITIONAL DEPLOYMENT CONTEXTS

Commercial Areas

High streets, markets and shopping centres

Public Parks

Open spaces, paths and recreation zones

Residential Hubs

Apartment complexes and gated communities

Transport Hubs

Bus stations and intermodal interchanges

Together, let us build safer, smarter, and more connected cities.

FOUNDER AND VISION

Vaasu Deep Kohli

Founder & CEO

PRAHARI Grid Systems

Founder's Message

"I founded PRAHARI to solve two persistent urban challenges: immediate access to help during emergencies and affordable public visibility for local businesses. By combining both into one intelligent infrastructure platform, every deployment creates safer, smarter, and more connected public spaces."

Our Mission

To build safer, smarter, and more connected public spaces through intelligent infrastructure, making emergency access a standard feature of every Indian city.

GET IN TOUCH

Partner with Us.

We welcome conversations with municipalities, smart city agencies, universities, commercial property owners, incubators, and strategic partners.
